Skills

Software Development

Java, Spring Boot, Microservices Architecture, REST APIs, Angular, React, Flutter, TypeScript, JavaScript

Cloud, DevOps & Distributed Systems

Kubernetes, Docker, ArgoCD, CI/CD, AWS, Google Cloud Platform, OVH Cloud, Apache Kafka, RabbitMQ, Event-Driven Architecture

Databases & Security

PostgreSQL, Oracle DB, Relational Databases, Keycloak, OAuth2, OpenID Connect

Languages

Spanish - Native

English - B2

French - A2

Software Engineer with experience in full stack development and microservices-based architectures in cloud-native environments on Kubernetes. Specialized in backend development with Spring Boot and frontend technologies such as Angular, React, and Flutter, with a strong focus on building scalable, reliable, and maintainable solutions.

Education

Universidad Politécnica de Valencia — **2018 - 2022**

Computer Engineering

UPV

Escuela de Negocios Europea de Barcelona — **2025 - 2026**

MBA

ENEB

Master of Business Administration (MBA) + Master in Project Management

Professional Experience

Sopra Steria — **May 2025 – Present**

Software Engineer

Sopra Steria

Development and evolution of systems based on microservices architectures within the financial domain of sports betting platforms, working in high-concurrency and mission-critical environments.

Backend development using Spring Boot, including the integration of messaging systems through Apache Kafka and RabbitMQ, as well as frontend development with Angular and React.Continuous integration and deployment processes using ArgoCD, with applications deployed on Kubernetes.

Agile methodologies, applying quality control practices such as code reviews, automated testing, and continuous validation.

Altia — **Oct 2024 - Apr 2025**

Software Engineer

Altia

Development and maintenance of distributed systems based on microservices architectures within a large-scale distributed infrastructure implemented by the European Patent Office (EPO).

Continuous work with Spring Boot and Apache Kafka in event-driven architectures, with deployments on Kubernetes and collaboration across multiple teams.

Professional Experience

Capgemini **Feb 2022 - Oct 2024**

Full Stack Developer

Projects based on microservices architectures and cloud environments, participating in the entire software lifecycle, from technical design to implementation, deployment, and maintenance.

Backend development with Spring Boot, designing REST APIs and service integrations using Eureka and OpenFeign, as well as frontend development with React, Angular, and Flutter, applying architectural patterns and development best practices.

Technical leadership responsibilities, coordinating the backend team, performing code reviews and mentoring junior developers.

Design and deployment of Kubernetes-based architectures, integrated with Keycloak, S3, and cloud providers such as AWS, Google Cloud, and OVH, including operational tasks.

Dialapplet **Jul 2021 - Oct 2021**

Software Developer Intern

Dialapplet

Solution-oriented environment for call centers. Analysis of the technologies and tools used within the domain.

Development and maintenance of C++ applications, on Linux systems and PostgreSQL databases.

Certifications

AWS Certified Solutions Architect – Associate **Apr 2024 - Apr 2027**

Amazon Web Services Training and Certification

Credly

OVH Discover Solution Architect **Nov 2023 - Nov 2026**

OVH Partner Program

Google Cloud Digital Leader **Mar 2023 - Mar 2026**

Google Cloud

Credly
