Languages

Spanish - Native

English - B2

French - A2

Software Engineer with experience in full stack development and microservices-based architectures in cloud-native environments on Kubernetes. Specialized in backend development with Spring Boot and frontend technologies such as Angular, React, and Flutter, with a strong focus on building scalable, reliable, and maintainable solutions.

Experienced in applying AI across the entire software development lifecycle, from requirements analysis and technical design to implementation, testing, code review, documentation, and maintenance, using AI coding agents and assistants to increase delivery speed without compromising quality.

Education

<u>Polytechnic University of Valencia</u>	Computer Engineering 2018 - 2022
<u>European Business School of Barcelona</u>	MBA 2025 - 2026

Master of Business Administration (MBA) + Master in Project Management

Professional Experience

<u>Sopra Steria</u>	May 2025 – Present
Software Engineer	
Development and evolution of microservices-based systems within the financial domain of sports betting platforms, in high-concurrency and mission-critical environments.	
Backend development with Spring Boot and messaging through Apache Kafka and RabbitMQ, along with frontend development in Angular and React. Continuous integration and deployment with ArgoCD on Kubernetes, under agile methodologies with code reviews and automated testing.	
Use of AI tools such as OpenCode across the whole development lifecycle: analysis of legacy code, technical design, implementation, automated testing, assisted code reviews, and documentation.	
<u>Altia</u>	Oct 2024 - Apr 2025
Software Engineer	
Development and maintenance of distributed systems based on microservices architectures within a large-scale distributed infrastructure implemented by the European Patent Office (EPO).	
Continuous work with Spring Boot and Apache Kafka in event-driven architectures, with deployments on Kubernetes and collaboration across multiple teams.	

Professional Experience

Cappgemini Full Stack Developer Projects based on microservices architectures and cloud environments, participating in the entire software lifecycle, from technical design to implementation, deployment, and maintenance. Backend development with Spring Boot, designing REST APIs and service integrations using Eureka and OpenFeign, as well as frontend development with React, Angular, and Flutter, applying architectural patterns and development best practices. Technical leadership responsibilities, coordinating the backend team, performing code reviews and mentoring junior developers. Design and deployment of Kubernetes-based architectures, integrated with Keycloak, S3, and cloud providers such as AWS, Google Cloud, and OVH, including operational tasks.	Feb 2022 - Oct 2024
---	---------------------

Dialapplet Software Developer Intern Solution-oriented environment for call centers. Analysis of the technologies and tools used within the domain. Development and maintenance of C++ applications, on Linux systems and PostgreSQL databases.	Jul 2021 - Oct 2021
---	---------------------

Certifications

AWS Certified Solutions Architect – Associate Amazon Web Services Training and Certification <u>Credly</u>	Apr 2024 - Apr 2027
OVH Discover Solution Architect <u>OVH Partner Program</u>	Nov 2023 - Nov 2026
Google Cloud Digital Leader Google Cloud <u>Credly</u>	Mar 2023 - Mar 2026

Skills

Software Development Java, Spring Boot, Microservices Architecture, REST APIs, Angular, React, Flutter, TypeScript, JavaScript
Cloud, DevOps & Distributed Systems Kubernetes, Docker, ArgoCD, CI/CD, AWS, Google Cloud Platform, OVH Cloud, Apache Kafka, RabbitMQ, Event-Driven Architecture
Databases & Security PostgreSQL, Oracle DB, Relational Databases, Keycloak, OAuth2, OpenID Connect
AI-Assisted Software Development OpenCode, AI Coding Agents, GitHub Copilot, LLMs, Prompt Engineering, MCP (Model Context Protocol), AI-Assisted Code Review, AI-Assisted Testing, AI-Assisted Documentation
